It can be deployed via cloud, dedicated server, or on-premise appliance, and delivers centralized control, automation, and monitoring for ISPs, MSPs, and IT professionals.

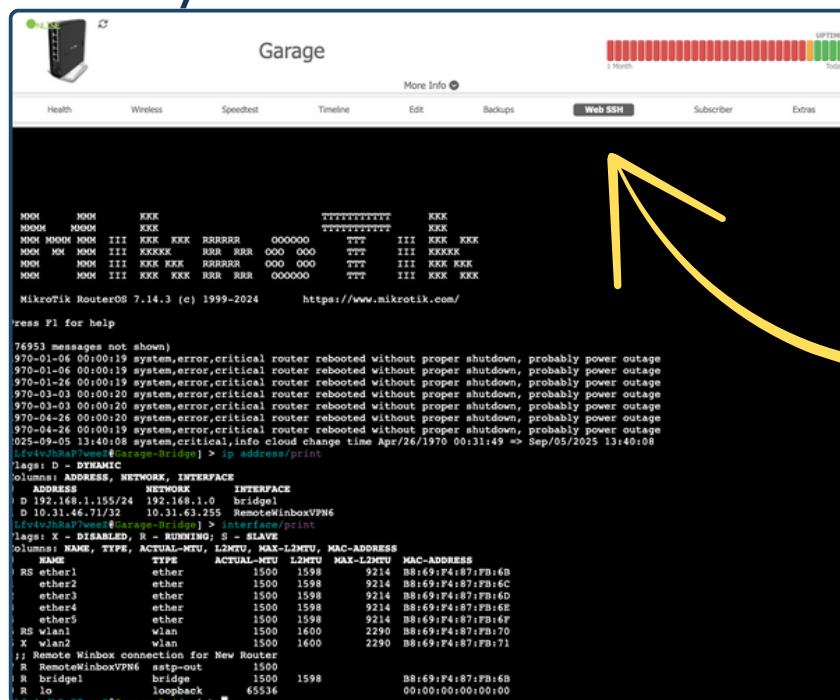

KEY CAPABILITIES

Centralized Management

Manage all MikroTik devices from a single, cloud-based dashboard with real-time visibility and control.

Secure Remote Access

Access devices via Winbox or SSH from anywhere.

Monitoring & Alerts

Receive SMS/email alerts for outages, changes, and critical events.

KEY CAPABILITIES

Automated Backups

Scheduled or on-demand device backups for fast recovery and change control.

Batch Operations & Scripting

Deploy firmware updates or config changes across many devices at once.

Network Automation Tools

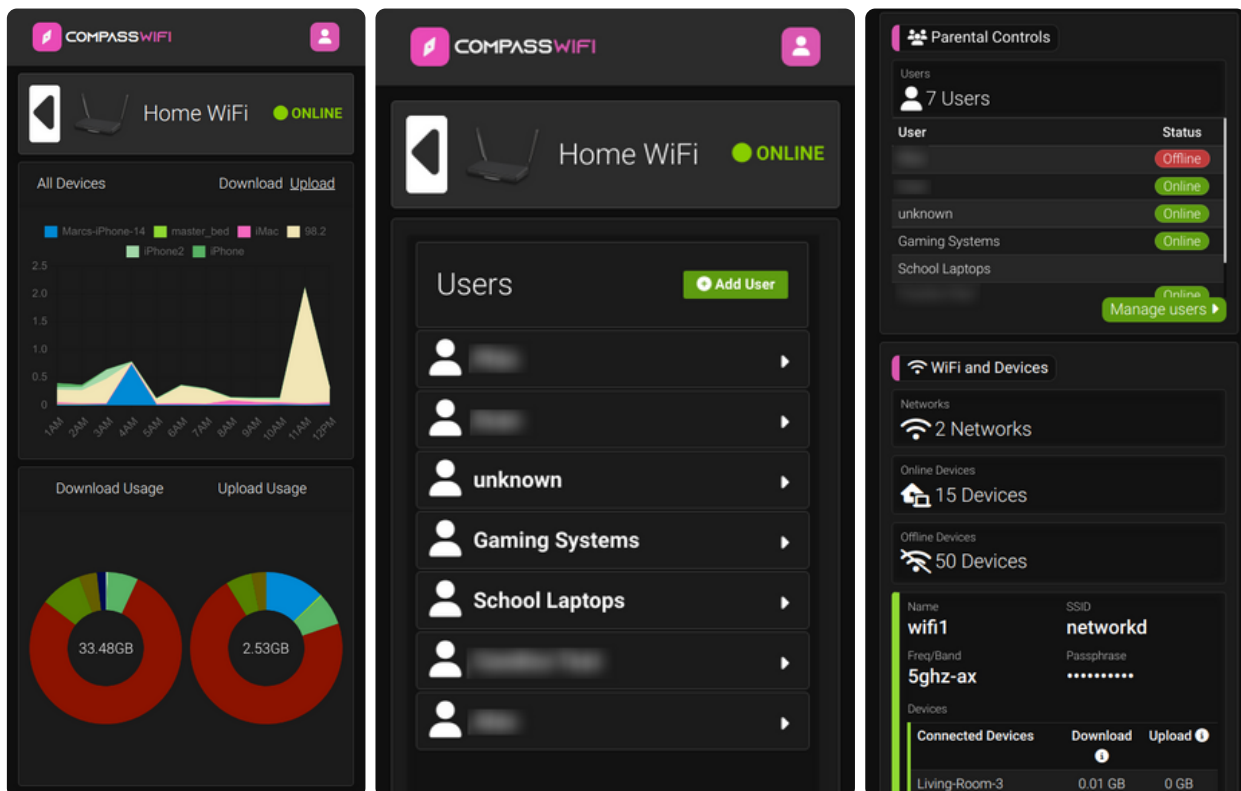

Topology mapping, speed testing, visual performance graphs, and role-based access.

KEY CAPABILITIES

Managed WiFi (Compass WiFi)

End-user dashboards for subscriber control, parental controls, and signal monitoring.

Customer Support & Integrations

Historical usage data, interface monitoring, billing integrations, REST API and 3rd-party notifications.

DEPLOYMENT OPTIONS

Cloud (Multi-Tenant)

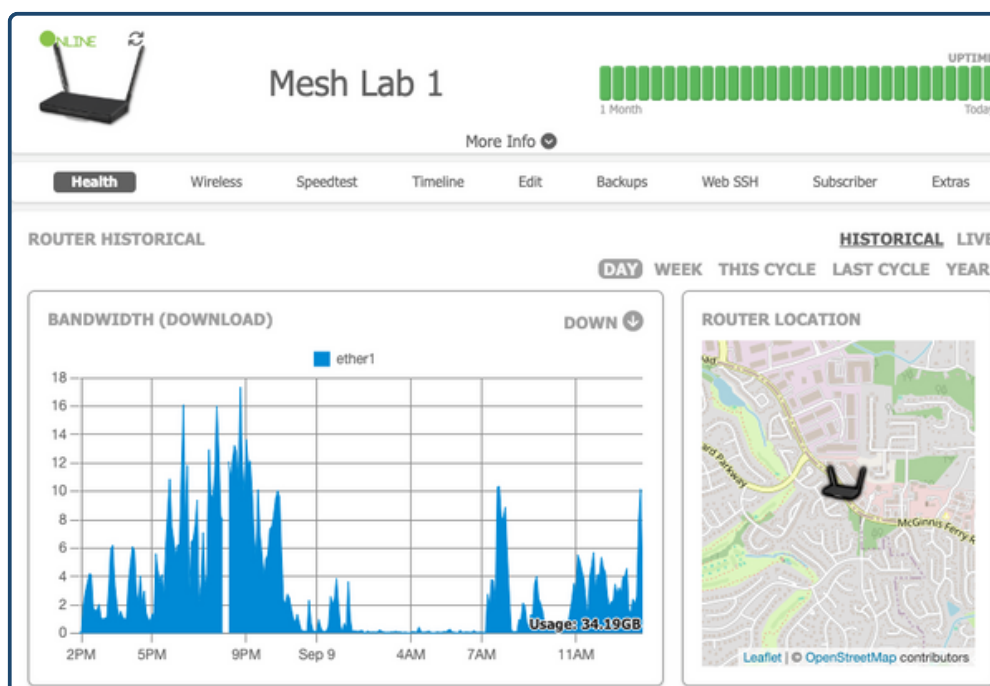

Up and running
in 5 minutes!

On-Premise Appliance

Available as a 1U
appliance or
bring-your-own-
hardware option.

Dedicated Deployment (Cloud or On-Prem)

For 500+
devices, includes
tenancy
isolation, custom
branding, offline
mode and
hardened
security.

WHY IT STANDS OUT

Efficiency Gains

Tasks that took hours now take seconds.

Scalability & Flexibility

Works for small to large deployments.

Security Focused

Encrypted tunnels, IP whitelisting, hardened environments.

Visualization & Automation

Dashboards, topology maps, proactive monitoring.

Built for MikroTik

Created by certified experts with deep API/integration support.

In summary: Admiral Platform is a robust SaaS solution for streamlined, secure, and scalable MikroTik network management—covering remote access, automation, monitoring, backups, and customer empowerment.
